

Priority Cool refrigerants are the future. These revolutionary natural hydrocarbon based refrigerants can save you 10 to 25% on annual A/C and refrigeration compressor energy costs simply by replacing your current refrigerant. No equipment or component changes necessary.

Priority Cool refrigerants are a direct replacement for many refrigeration and air conditioning systems currently using R-22, R-502, R-12 or HFC-134a. **The Priority Cool replacement schedule is as follows:**

PRIORITY COOL SUBSTITUTES

In the USA HC-12a/134+ replaces the following:

- R-12 in industrial process refrigeration
- R-12 substitutes
- R-134a and R-134a substitutes

Internationally & Canada HC-12a/134+ replaces the following:

- R-12
- R-134a
- all additional R-12 and R-134a substitutes

In the USA HC-22a/502a replaces the following substitutes:

- R-404a
- R-407a
- R-407c
- R-410a
- R-417a
- R-507

Internationally & Canada HC-22a/502a replaces the following:

- R-22
- R-404a
- R-407c
- R-410a
- R-417a
- R-502
- R-507
- all additional R-22 and R-502 substitutes
